Abstracts

The global Organic Dog Food market size is expected to reach \$ 60183 million by 2032, rising at a market growth of 6.7% CAGR during the forecast period (2026-2032).

In 2025, global sales volume of organic dog food is estimated at approximately 6.2 million tons, with an average selling price of around USD 6,350 per ton. Organic dog food refers to canine pet food products that comply with certified organic standards such as USDA Organic or EU Organic at both the agricultural and livestock production stages. It requires that raw materials are produced without synthetic pesticides, chemical fertilizers, antibiotics, or growth hormones, and that processing minimizes artificial additives, preservatives, and synthetic flavorings. These products are typically formulated using organic animal proteins, organic grains, or organic plant-based ingredients, and produced in dry, wet, or freeze-dried formats, targeting mid-to-high-end consumers who prioritize food safety, natural sourcing, and ingredient traceability. Organic dog food is characterized by strict raw material standards, certified production systems, and lower processing intervention, with formulations emphasizing balanced combinations of organic meats, organic grains, and natural functional nutrients. Compared with conventional dog food, it involves significantly higher raw material costs, certification expenses, and supply chain complexity, resulting in a premium pricing structure. Current product categories include organic dry food, organic wet food, and organic functional diets (such as gastrointestinal care, skin health, and immune support), with the industry evolving toward transparent supply chains, reduced processing intensity, and more specialized functional nutrition segmentation.

Organic dog food is an important segment within the global pet food market, combining organic certification systems with mid-to-premium pet food upgrading trends. Demand is driven primarily by increasing food safety awareness, the rise of natural pet food

consumption, and the humanization of pet feeding behavior. North America and Europe are the main consumption markets, with North America holding the largest share due to its mature organic certification system and strong purchasing power, while Japan and China's premium markets are growing rapidly but still remain at relatively low penetration levels. The category mainly targets middle- to high-income pet owners, small-breed dogs, and dogs with sensitivities, with strong reliance on ingredient safety, traceability, and certification systems. From a competitive perspective, the market is dominated by organic-certified pet food companies and natural pet food brands, including Castor & Pollux, Tender & True, and organic product lines of major global pet food corporations. Key barriers include organic raw material supply systems, certification compliance costs, cross-border regulatory capabilities, and stable supply chain management. Due to limited agricultural output for organic raw materials, the industry exhibits a 'high cost, limited scale, high premium' structure. Key trends include tightening organic certification standards, organic-functional nutrition integration, and increasing importance of transparent and traceable supply chains as core competitiveness, while organic labeling does not necessarily imply higher nutritional value but primarily reflects safety and raw material control.

This report studies the global Organic Dog Food production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Organic Dog Food and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Organic Dog Food that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Organic Dog Food total production and demand, 2021-2032, (Kiloton)

Global Organic Dog Food total production value, 2021-2032, (USD Million)

Global Organic Dog Food production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Kiloton), (based on production site)
