Abstracts

According to our (Global Info Research) latest study, the global Organic Feminine Care market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Organic feminine care refers to the use of menstrual products that are made from organic and natural materials, without the use of synthetic materials, fragrances, or chemicals. These products are designed to be safe, gentle, and environmentally friendly, and can include items such as tampons, pads, menstrual cups, and liners.

Organic feminine care products are becoming increasingly popular among women who are concerned about the impact of synthetic materials and chemicals on their health and the environment. Many of these products are made from organic cotton or other natural materials, which are grown without the use of pesticides or synthetic fertilizers. This can help to reduce exposure to harmful chemicals that can be found in conventional menstrual products.
