According to our (Global Info Research) latest study, the global Organic Oilseed Farming market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Organic oilseed farming is a form of agriculture that focuses on the cultivation of oil-bearing crops using organic farming practices. Organic farming eschews the use of synthetic fertilizers, pesticides, and genetically modified organisms (GMOs), relying instead on natural processes to nurture soil health and manage pests and diseases. Organic oilseed farming prioritizes sustainability, environmental conservation, and the production of high-quality, chemical-free oilseeds.

The global organic oilseed farming market has been witnessing steady growth over the past decade. Increasing consumer awareness of health and environmental concerns has driven demand for organic food products, including organic oils extracted from various oilseed crops. Additionally, the rising popularity of plant-based diets and the demand for organic and sustainable ingredients in the food industry have further boosted the market for organic oilseeds. North America and Europe have been significant markets for organic oilseed farming, driven by strong consumer demand for organic food products and a well-established organic food industry in these regions. Asia-Pacific is witnessing rapid growth in the organic oilseed market due to the increasing adoption of organic farming practices, rising consumer awareness, and a growing market for organic food products. The global organic oilseed farming market is expected to continue its positive growth trajectory. Factors such as the rising demand for organic foods, the increasing adoption of organic farming practices, and the focus on sustainable agriculture are likely to drive market expansion. Advancements in organic

farming techniques, seed development, and organic supply chain management will play a crucial role in meeting the growing demand for organic oilseeds and oils.
