## Abstracts

The global Organic Peroxide Initiator market size is expected to reach \$ 2080.6 million by 2029, rising at a market growth of 2.0% CAGR during the forecast period (2023-2029).

Global key players of organic peroxide initiator include Nouryon, Arkema and United Initiators. The top three players hold a share over 70%. Nouryon is the largest producer, has a share about 33%. In terms of product type, Diacyl Peroxide is the largest segment, occupied for a share of 26%, and in terms of application, PVC Polymerization has a share about 27 percent.

Organic peroxides are organic compounds containing the peroxide functional group (ROOR'). If the R' is hydrogen, the compounds are called organic hydroperoxides. Peresters have general structure RC(O)OOR. The O-O bond easily breaks, producing free radicals of the form RO•. Thus, organic peroxides are useful as initiators for some types of polymerisation, such as the epoxy resins used in glass-reinforced plastics.
