Abstracts

The global Organic Pigments market size is expected to reach \$ 14310 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Organic pigments are colored, black, white or fluorescent particulate organic solids which usually are insoluble in, and essentially physically and chemically unaffected by, the vehicle or substrate in which they are incorporated. They alter appearance by selective absorption and/or by scattering of light. Organic pigments are usually dispersed in vehicles or substrates for application, as for instance in the manufacture of inks, paints, plastics or other polymeric materials. Organic pigments retain a crystal or particulate structure throughout the coloration process.

Global Organic Pigments key players include BASF, Clariant, DIC, Huntsman, Toyokoink, etc. Global top five manufacturers hold a share over 60%.

China is the largest market, with a share over 30%, followed by Asia(ex.China) and Europe, both have a share over 45%.

In terms of product, Azoic Pigments is the largest segment, with a share over 50%. And in terms of application, the largest application is Paints & Coatings, followed by Printing Inks, Plastics & Rubber, etc.

This report studies the global Organic Pigments production, demand, key manufacturers, and key regions.
