Abstracts

Quinoa is a flowering plant that belongs to the amaranth family. It is an herbaceous annual plant grown primarily for its edible seeds, which are high in protein, fibre, B vitamins, and minerals when compared to many grains. Organic quinoa is grown without the use of any fertilizers, chemical additives, pesticides, non-GMO, or other potentially harmful insecticides. Quinoa flour is a healthier alternative to corn or white flour, which is used in a variety of products. Its richness in vitamin B complexes, magnesium, calcium, and iron, among other essential nutrients, distinguishes and distinguishes it from regular white flour.
