Abstracts

According to our (Global Info Research) latest study, the global Organic Rankine Cycle System for Waste Heat Recovery market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Waste heat refers to the sensible heat and latent heat that have not been rationally utilized in the original design in the energy-consuming devices of industrial enterprises that have been put into operation due to the limitations of history, technology, ideas and other factors. It includes waste heat of high-temperature exhaust gas, waste heat of cooling medium, waste heat of waste steam and waste water, waste heat of high-temperature products and slag, waste heat of chemical reaction, waste heat of combustible waste gas and liquid, waste heat, etc. According to the survey, the total waste heat resources of various industries account for about 17% to 67% of their total fuel consumption, and the recyclable waste heat resources are about 60% of the total waste heat resources.

This report is a detailed and comprehensive analysis for global Organic Rankine Cycle System for Waste Heat Recovery market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:

Global Organic Rankine Cycle System for Waste Heat Recovery market size and forecasts, in consumption value ($ Million), 2018-2029

Global Organic Rankine Cycle System for Waste Heat Recovery market size and forecasts by region and country, in consumption value ($ Million), 2018-2029

Global Organic Rankine Cycle System for Waste Heat Recovery market size and forecasts, by Type and by Application, in consumption value ($ Million), 2018-2029

Global Organic Rankine Cycle System for Waste Heat Recovery market shares of main players, in revenue ($ Million), 2018-2023

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Organic Rankine Cycle System for Waste Heat Recovery

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Organic Rankine Cycle System for Waste Heat Recovery market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include ABB, MHI, Siemens, GE and Kawasaki, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

Market segmentation

Organic Rankine Cycle System for Waste Heat Recovery market is split by Type and by Application. For the period 2018-2029, the growth among segments provide accurate calculations and forecasts for consumption value by Type and by Application. This

analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Upstream Sector

Midstream Sector

Downstream Industry

Market segment by Application

Petroleum Refining

Heavy Metal Production

Cement

Chemical

Others

Market segment by players, this report covers

ABB

MHI

Siemens

GE

Kawasaki

Ormat

Foster Wheeler

+44 20 8123 2220

Bosch

Echogen Power Systems

EST (Wasabi)

Thermax

Market segment by regions, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, UK, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia, Australia and Rest of Asia-Pacific)

South America (Brazil, Argentina and Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

The content of the study subjects, includes a total of 13 chapters:

Chapter 1, to describe Organic Rankine Cycle System for Waste Heat Recovery product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Organic Rankine Cycle System for Waste Heat Recovery, with revenue, gross margin and global market share of Organic Rankine Cycle System for Waste Heat Recovery from 2018 to 2023.

Chapter 3, the Organic Rankine Cycle System for Waste Heat Recovery competitive situation, revenue and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and application, with consumption value and growth rate by Type, application, from 2018 to 2029.

+44 20 8123 2220
info@marketpublishers.com

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2018 to 2023.and Organic Rankine Cycle System for Waste Heat Recovery market forecast, by regions, type and application, with consumption value, from 2024 to 2029.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis, and Influence of COVID-19 and Russia-Ukraine War

Chapter 12, the key raw materials and key suppliers, and industry chain of Organic Rankine Cycle System for Waste Heat Recovery.

Chapter 13, to describe Organic Rankine Cycle System for Waste Heat Recovery research findings and conclusion.
