Organic feed is food or fodder made from certified organic ingredients for cattle, goats, poultry, swine, and other livestock. Wheat, barley, soybeans, corn, and crops grown without the use of fertilisers or chemical pesticides make the crop organic in nature. Organic feed comes in a variety of forms, including crumbles, mashes, and pelleted feeds, and is commonly requested by livestock owners who supply organic milk and meat.

Organic ruminant feed not only improves performance and meets the daily needs of ruminants, but also protects them from muscle diseases such as laminitis and nitrogenuria. Even without a gallbladder, ruminants require dietary fat to perform well. Ruminants can digest dietary fats that have nutritional benefits such as increased absorption of vitamins, omega-6 and omega-3 fatty acids, and more. Growing demand for comprehensive organic nutrition for ruminants is driving the demand for organic feed for ruminants.
