Abstracts

Tofu, also known as bean curd, is a food prepared by coagulating soy milk and then pressing the resulting curds into solid white blocks of varying softness. Tofu is made up of three ingredients: soybeans, water, and a coagulant—usually nigari (magnesium chloride) or gypsum (calcium sulfate).

Organic Tofu by law has to be made from organic, non GM soya beans which are grown sustainably without using artificial fertilizers, herbicides and pesticides. Environmentally, organic soya is a very beneficial crop because its roots fix nitrogen in the soil which most other plants take out.

This report studies the global Organic Tofu production, demand, key manufacturers, and key regions.
