## Abstracts

According to our (Global Info Research) latest study, the global Organoid Matrix Gel market size was valued at US\$ 43.47 million in 2025 and is forecast to a readjusted size of US\$ 160 million by 2032 with a CAGR of 19.8% during review period.

Organoid matrix gel typically refers to an EHS-tumor–derived soluble basement membrane extract (BME), exemplified by Matrigel, Geltrex and Cultrex. It is enriched in laminin, collagen IV, entactin/nidogen and heparan sulfate proteoglycans; it remains liquid on ice and polymerizes into a hydrogel at 37 °C, recreating a basement-membrane-like 3D ECM niche that supports organoid/tumoroid establishment, differentiation and long-term passaging.

Upstream, organoid matrix gels rely on an EHS mouse sarcoma tumor bio-source and a BME (“whole-tumor/basement-membrane extract”) manufacturing backbone, with extraction, clarification/concentration, and sterile fill-finish typically performed under tight cold-chain temperature control.

In 2025, global organoid matrix gel production reached approximately 1,000 liters, with an average global market price is \$45 per ml.
