## Abstracts

The global Organoid Matrix Gel market size is expected to reach \$ 160 million by 2032, rising at a market growth of 19.8% CAGR during the forecast period (2026-2032).

Organoid matrix gel typically refers to an EHS-tumor–derived soluble basement membrane extract (BME), exemplified by Matrigel, Geltrex and Cultrex. It is enriched in laminin, collagen IV, entactin/nidogen and heparan sulfate proteoglycans; it remains liquid on ice and polymerizes into a hydrogel at 37 °C, recreating a basement-membrane-like 3D ECM niche that supports organoid/tumoroid establishment, differentiation and long-term passaging.

Upstream, organoid matrix gels rely on an EHS mouse sarcoma tumor bio-source and a BME (“whole-tumor/basement-membrane extract”) manufacturing backbone, with extraction, clarification/concentration, and sterile fill-finish typically performed under tight cold-chain temperature control.

In 2025, global organoid matrix gel production reached approximately 1,000 liters, with an average global market price is \$45 per ml.

This report studies the global Organoid Matrix Gel production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Organoid Matrix Gel and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
