The global Oriented Silicon Steel Sheet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Oriented silicon steel sheet, also known as direction-oriented silicon steel sheet or oriented silicon steel sheet, is a special type of silicon steel sheet. Through special processing technology and orientation technology, the oriented silicon steel sheet has high magnetic permeability and low magnetic resistance performance in a specific direction. This makes it exhibit excellent magnetic permeability characteristics in electromagnetic fields, which can reduce eddy current loss and hysteresis loss in equipment such as motors and transformers, thereby improving the energy efficiency of equipment.
