Abstracts

The global Ortho-K Contact Lens Care Solution market size is expected to reach \$ 570 million by 2032, rising at a market growth of 7.2% CAGR during the forecast period (2026-2032).

In 2025, global Ortho-K Contact Lens Care Solution production reached approximately 24,874.1 K units, with an average global market price of around 13.5 US\$/Unit.

Ortho-K Lens Care Solution is a specialized sterile cleaning and maintenance solution formulated exclusively for orthokeratology lenses, also known as overnight vision correction lenses. It integrates cleaning, disinfection, moisturizing, protein removal and lubricating functions to remove deposits, inhibit bacteria, maintain lens surface smoothness and biocompatibility, ensure safe daily use and prolong lens service life, and must comply with medical device hygiene standards for safe use by Ortho-K wearers under professional guidance.

The average single-line production capacity of Ortho-K Contact Lens Care Solution is 2,000 K units, the average gross profit margin was 54.5%.

The cost structure of Ortho-K Contact Lens Care Solution has clear weights: core functional raw materials (48%-53%, including disinfectants, surfactant cleaners, moisturizers, protein removers and isotonic buffer agents) account for the largest share. Packaging materials (20%-24%, mainly medical-grade plastic bottles, sealing caps and sterile outer packaging) follow. Production and sterile processing costs are 13%-16%, R&D costs for formula optimization and safety testing are 6%-9%, and the remaining 4%-6% goes to logistics, marketing and after-sales services.

The industry chain of Ortho-K Contact Lens Care Solution covers three sectors: upstream includes suppliers of medical-grade raw materials, sterile packaging materials and automated filling and disinfection equipment; midstream consists of brand manufacturers and OEM/ODM enterprises responsible for R&D, sterile production, quality control and packaging, complying with medical device standards; downstream includes optical shops, ophthalmic hospitals, professional eye care institutions and e-commerce platforms, with end users being Ortho-K lens wearers, mainly teenagers and young adults.

Demand for Ortho-K Contact Lens Care Solution is driven by the rising incidence of myopia among teenagers, growing adoption of Ortho-K lenses and increasing emphasis on scientific and safe lens care. Business opportunities lie in developing mild, hypoallergenic and preservative-free formulas, launching multi-functional and portable small packages, expanding cooperation with ophthalmic institutions, strengthening professional market education, exploring overseas emerging markets, and improving product safety and comfort to enhance market competitiveness.
