Abstracts

Orthodontics is the branch of dentistry that deals with the prevention and correction of irregular teeth and jaws as by means of braces or other supportive devices.

Orthodontics services are used to treat irregular teeth and teeth that do not fit together correctly that are harder to keep clean, which are at risk of being lost early due to tooth decay and periodontal disease.

SCOPE OF THE REPORT:

This report studies the Orthodontic Services market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Orthodontic Services market by product type and applications/end industries.

Orthodontic dental treatment is the correction of improperly positioned teeth and its related problems by using braces and retainers. Braces are the most common orthodontics used for the tooth correction. The correct alignment of teeth is very essential, as it assists the process of chewing food. The dental imaging is beneficial in determining the type of orthodontic treatment and the necessary support for the correction of the tooth. In addition, misaligned teeth can undermine confidence and impacts the personal and social life; hence, individuals seek orthodontic treatment to increase the confidence.
