SCOPE OF THE REPORT:

Orthopedics is the study of the musculoskeletal system including the spine, bones, joints, ligaments, tendons, muscles and nerves. An orthopedist or orthopedic surgeon is a doctor that specializes in the prevention, diagnosis, and treatment including surgery of the musculoskeletal system.

The main drivers of the orthopaedics market remain demographic & economic parameters. Product innovation, resulting in a better (or higher) Product Mix, is boosting the market. They should remain the major growth contributors in the future. The trend towards reimbursement results in price pressure. This is the main limiter of the orthopaedic market. Price erosion of mature products in orthopaedics has been a constant over the past 20 years. We do not expect a major shift, but some countries will suffer more significant price decreases than others.

The global Orthopedic Connectors market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.
