Ostomy barrier rings and seals are soft, moldable devices designed to provide a secure and protective barrier around a stoma (an artificial opening in the abdomen for waste elimination). These products are typically made from skin-friendly materials such as hydrocolloids or other adhesive compounds, ensuring a comfortable fit while preventing leakage and protecting the peristomal skin from irritation. They are used to enhance the seal between the stoma and the ostomy pouch, improving overall adhesion and reducing the risk of skin damage. Their flexible nature allows them to conform to the stoma's shape, offering a customized and reliable solution for ostomy care.
