## Abstracts

The global OTC Migraine Medicine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

One of the primary market drivers for headache medicine is the high prevalence of headaches and migraines among the global population. Headaches are one of the most common medical complaints, affecting a significant number of individuals across different age groups and demographics. Migraines, in particular, can be debilitating and significantly impact a person's quality of life, leading to a higher demand for effective headache medications. Additionally, the increasing awareness and understanding of headaches and migraines have contributed to the growth of the headache medicine market. As people become more informed about these conditions and their treatment options, they are more likely to seek medical help and utilize headache medications. Over-the-counter (OTC) migraine medicines are non-prescription medications that can be purchased directly from a pharmacy or retail store without a doctor's prescription. These medicines are intended to provide relief from the symptoms of migraines, such as headache, nausea, and sensitivity to light and sound.

This report studies the global OTC Migraine Medicine demand, key companies, and key regions.
