Abstracts

The global Outbuildings market size is expected to reach \$ 1769 million by 2032, rising at a market growth of 2.5% CAGR during the forecast period (2026-2032).

Outbuildings are small buildings for keeping things in or working in which are near a house, on the land belonging to it.

Outbuildings refer to any building that is free standing and not attached to your main home. This could include a greenhouse, pool house, shed, gazebo, or barn. One thing that most outbuildings (although not all) have in common that makes them simpler and less expensive to build than a home, is that most of them do not have foundations. The types of outbuildings that do have foundations tend to have only a simple cement slab foundation, rather than the type that sits below ground level. For this reason, outbuildings can be constructed more inexpensively and faster than an addition to your home or a new building with an excavated foundation.

The main manufacturers of Outbuildings are Backyard Storage, Trimetals, Newell Rubbermaid, Keter Plastic, Lifetime, etc. The top three manufacturers have about 30% of the market share.

North America is the world's largest market, with a market share of about 60%, followed by Europe with a market share of about 20%.

This report studies the global Outbuildings production, demand, key manufacturers, and key regions.
