An emergency shower station is a safety device that provides immediate flushing of the eyes and rinsing of the body with an appropriate amount of water in the event of an emergency or accident to neutralize the effects of hazardous chemicals or materials. It is commonly found in industrial environments, such as chemical plants, where hazardous materials are used. The device can be easily accessed to protect workers from hazardous materials or accidents. An indoor and outdoor emergency shower and eyewash station is a type of emergency equipment that is helpful in reducing the risk of chemical and industrial pollutants on the face and eyes.
