Abstracts

The global Outdoor Heating market size is expected to reach \$ 904 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

Outdoor Heater, also called Patio Heater, (also called a mushroom or umbrella heater) is an appliance for generating radiant heat for outdoor use.

A burner on top of a post, burns liquefied petroleum gas (LPG), propane or butane, and directs the flames against a perforated metal screen. Heat is radiated from the surface of the screen in a circular pattern around the appliance. A reflector atop the burner reflects heat that would be otherwise lost upwards. This is because the reflecting hood is usually silvered which makes it a poor absorber/emitter of heat but excellent at reflecting infra-red radiation back. This reduces the amount of heat lost by conduction as silvered surfaces will not absorb infra-red light.

In United States, the key Outdoor Heating manufacturers are Infrared Dynamics, Garden Sun, Fire Sense, Sunheat International, AZ Patio Heaters, Blue Rhino, Lava Heat Italia, Bromic Heating etc.

This report studies the global Outdoor Heating production, demand, key manufacturers, and key regions.
