## Abstracts

According to our (Global Info Research) latest study, the global Outdoor Heating market size was valued at USD 505.9 million in 2023 and is forecast to a readjusted size of USD 757.4 million by 2030 with a CAGR of 5.9% during review period.

Outdoor Heater, also called Patio Heater, (also called a mushroom or umbrella heater) is an appliance for generating radiant heat for outdoor use.

A burner on top of a post, burns liquefied petroleum gas (LPG), propane or butane, and directs the flames against a perforated metal screen. Heat is radiated from the surface of the screen in a circular pattern around the appliance. A reflector atop the burner reflects heat that would be otherwise lost upwards. This is because the reflecting hood is usually silvered which makes it a poor absorber/emitter of heat but excellent at reflecting infra-red radiation back. This reduces the amount of heat lost by conduction as silvered surfaces will not absorb infra-red light.

In United States, the key Outdoor Heating manufacturers are Infrared Dynamics, Garden Sun, Fire Sense, Sunheat International, AZ Patio Heaters, Blue Rhino, Lava Heat Italia, Bromic Heating etc.

The Global Info Research report includes an overview of the development of the Outdoor Heating industry chain, the market status of Restaurant Patios (Standalone Heaters, Tabletop), Rooftop Decks (Standalone Heaters, Tabletop), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Outdoor Heating.
