## Abstracts

The global Outfield Gloves market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Outfield gloves feature a deeper pocket that prioritizes securing the ball after the catch. Outfield gloves are usually quite long with deep pockets to help catch fly balls on the run or in a dive, and to keep outfielders from having to bend down as far to field a ground ball. These gloves typically have 12-to-12+3?4-inch (305–324 mm) patterns, measured from wrist to the tip. They are frequently worn-in differently from those of infielders, with a flatter squeeze rather than the infielder's rounded style.

This report studies the global Outfield Gloves production, demand, key manufacturers, and key regions.
