## Abstracts

Over-flow disinfection robot does not need to be laid in advance and manually marked, and it is quick to deploy on site. Fully automatic navigation and automatic charging during driving, and people who encounter dynamics can avoid obstacles independently. When in use, the robot status, tasks and battery status can be monitored remotely. The disinfection circuit of the robot can be set freely, and the disinfection ability complies with the 'Technical Specifications for Disinfection of Medical Institutions' with a built-in ultraviolet lamp when working. The combination of high-power fan and filter module for air disinfection can realize the coexistence of man and machine.
