## Abstracts

The global Over-the-Side Heaters market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Over-the-side heaters are immersion heaters that hang over the side of a tank to heat the tank itself, or the materials within. Over-the-side heaters are used in situations where heaters cannot be installed, portability is required, or where heaters must be removed for cleaning without emptying the tank. In addition to heating materials in a tank, over-the-side heaters may be used prevent freezing or to heat viscous materials to induce and improve flow.

This report studies the global Over-the-Side Heaters production, demand, key manufacturers, and key regions.
