According to our (Global Info Research) latest study, the global Oxidizers and Reducers market size was valued at USD 921.9 million in 2023 and is forecast to a readjusted size of USD 1397.7 million by 2030 with a CAGR of 6.1% during review period.

Bleaching agents are usually oxidizers or reducers. Oxidizing bleaching specialists constitute a significant part of dyeing agents. The most commonly used oxidizing and bleaching agents are either chlorine-based, peroxide-based, or chemical-based. These agents are consumed in different applications including color change or retention, materials or water, disinfecting textiles, effluent control, stain removal, and for deodorizing substrates.

Increase in utilization of bleaching agents for cosmetic and medical purposes is trending these days. Hydrogen peroxide, a peroxide-based dye, is broadly utilized as a part of individual and other healthcare products. Teeth brightening and oxidative hair dyeing are some of the examples of such healthcare and personal products.
