Abstracts

The global Oxygen Hydraulic Dermabrasion Machine market size is expected to reach \$ 624 million by 2032, rising at a market growth of 8.5% CAGR during the forecast period (2026-2032).

In 2025, global Oxygen Hydraulic Dermabrasion Machine production reached approximately 120,000 units. The oxygen hydro dermabrasion machine is a beauty care device that combines high-pressure water flow, oxygen spray, and skin cleansing technologies, mainly used for deep skin cleansing, exfoliation, and pore care. The device typically uses high-speed water flow together with oxygen-enriched solutions or serums to gently flush and vacuum-clean the skin surface, while oxygen infusion technology helps improve skin oxygenation and enhance the absorption of skincare solutions. This process can help improve rough skin texture, clogged pores, excess oil buildup, and dull complexion. Featuring non-invasive operation, low skin irritation, and high treatment comfort, the equipment is widely used in beauty salons, skin management centers, and medical aesthetic care applications. As beauty care equipment continues to evolve toward intelligent, multifunctional, and personalized development, modern oxygen hydro dermabrasion machines are often equipped with multi-mode water flow adjustment, vacuum suction, serum infusion, and intelligent control systems to enhance treatment effectiveness and operational safety.

The oxygen hydro dermabrasion machine market has experienced steady growth in recent years, driven by the upgrading of skincare consumption, the increasing popularity of non-invasive beauty treatments, and rising consumer demand for deep cleansing and skin hydration rejuvenation. As a beauty device integrating cleansing, exfoliation, hydration infusion, and oxygen therapy, it is widely used in beauty salons, skin management centers, medical aesthetic institutions, and high-end home care

applications. With consumers placing greater emphasis on treatment comfort, safety, and immediate visible results, demand continues to grow for features such as water-oxygen spray systems, vacuum suction, serum infusion, multifunctional treatment handles, and intelligent parameter adjustment. At the same time, beauty service providers are enhancing service diversity and customer experience, driving oxygen hydro dermabrasion machines toward multifunctional integration, intelligent operation, portability, and higher operational stability. In the future, the market is expected to maintain growth potential, while competition will increasingly focus on cleansing performance, hydration infusion capability, device safety, operational convenience, product durability, and after-sales service quality.
