The global Oxygenator market size is expected to reach \$ 433 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

An oxygenator is a medical device that is capable of exchanging oxygen and carbon dioxide in the blood of human patient during surgical procedures that may necessitate the interruption or cessation of blood flow in the body, a critical organ or great blood vessel. These organs can be the heart, lungs or liver, while the great vessels can be the aorta, pulmonary artery, pulmonary veins or vena cava. An oxygenator is typically utilized by a perfusionist in cardiac surgery in conjunction with the heart-lung machine. However, oxygenators can also be utilized in extracorporeal membrane oxygenation in neonatal intensive care by nurses.

The global Oxygenator market is dominated by Europe (34%) and United States (30%). Main players are Medtronic, Maquet, Sorin, Terumo and Xenios. Top five players enjoy more than 65% market share.
