According to our (Global Info Research) latest study, the global Ozone Destruct Catalyst market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The purpose of ozone depletion is to convert the surrounding ozone gas into harmless oxygen, which is then released into the atmosphere. Ozone destruction catalysts can efficiently decompose ozone into oxygen, eliminate ozone odors, and meet exhaust emission standards. As they are made of flame-retardant materials, there is no risk of combustion or explosion due to ozone
