Abstracts

The global Ozone Destruct Catalyst market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The purpose of ozone depletion is to convert the surrounding ozone gas into harmless oxygen, which is then released into the atmosphere. Ozone destruction catalysts can efficiently decompose ozone into oxygen, eliminate ozone odors, and meet exhaust emission standards. As they are made of flame-retardant materials, there is no risk of combustion or explosion due to ozone
