According to our (Global Info Research) latest study, the global Packaging Steel market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Packaging Steel is used for Steel packaging. Steel packaging is a unique packaging material that offers exceptional performance capabilities and unrivaled environmental credentials¹. It is used in a wide variety of applications, such as containers and closures for human and pet foods, beverages, aerosols, personal care, household and automotive care products, industrial products and paints, giftware and promotional products². Steel packaging offers 100% barrier protection against light, water and air, and is the most tamper-resistant food packaging option available today. By extending the product's shelf-life, steel cans allow longer sell-by and use-by dates, thus reducing waste.
