Abstracts

According to our (Global Info Research) latest study, the global Pad Mounted Switchgear market size was valued at USD 5289.8 million in 2023 and is forecast to a readjusted size of USD 9608.2 million by 2030 with a CAGR of 8.9% during review period.

Solid dielectric type pad-mounted switchgear is currently fast growing technology introduced by G&W Electric (U.S.) and is considered as the best alternative when compared to conventional oil insulated pad-mounted switchgears. Solid dielectric insulations make these switchgears suitable for wet and corrosive environment, vertical or horizontal mounting, and use in any altitude. Also, since epoxy is inert and, environmental friendly, no EPA usage restrictions are implied making it easily acceptable in the market.

The increasing demand for Pad Mounted Switchgear drives the market. Increasing transmission and distribution investment and high efficient underground distribution systems are key factors to drive the growth of market. The underground distribution system is growing rapidly owing to shift change in trend. It amplifies the reliability and efficiency of the electrical supply with the advantage of being less susceptible to lightning and offers easy diagnosis of faults. U.K. and France are the fastest growth markets in the region. Europe is expected to have the largest market share for pad mounted switchgear. The market is driven by replacement of existing transmission system, improving the reliability of the grid and switching from overhead line to underground transmission systems. Asia pacific is expected to have moderate growth in this pad mounted switchgear market owing to high initial cost for the replacement of existing transmission system.
