Abstracts

According to our (Global Info Research) latest study, the global Paid Micro-Short Drama Production market size was valued at US$ 11180 million in 2025 and is forecast to a readjusted size of US$ 51130 million by 2032 with a CAGR of 24.5% during review period.

Short dramas, also known as "micro-dramas" or "mini-theaters," refer to a new type of film and television format where each episode is shorter than a traditional TV series, has lower production costs, is primarily distributed via vertical screen on mobile phones, and involves online influencers in production. Micro-dramas are defined as episodes less than 10 minutes long, becoming the fourth officially recognized form of online film and television work after web dramas, web movies, and web animations. The vertical screen short drama industry chain is a complete ecosystem centered on content production, encompassing technical support, platform distribution, user consumption, and derivative services. Its links are closely interconnected, forming a closed loop from creation to monetization.

Vertical Screen Short Drama Industry Chain Analysis: The upstream mainly consists of IP copyright holders. IP copyright holders provide their own IP resources to short drama producers, who then adapt them into short drama scripts. Currently, short drama IP sources include novels, comics, and games. Due to the compact plot characteristics of short dramas, they highly align with online "fast-paced" novels. Among the types of short drama IP copyright holders, online literature institutions account for nearly half due to their content reserves.

The midstream mainly consists of short drama production companies, which are

primarily responsible for connecting with upstream resources, rewriting scripts, filming, and post-production, transforming content into online micro-dramas. These short drama production companies are mainly transformed from information flow companies, traditional film and television companies, and MCN companies, as well as some IP copyright companies. Companies include: Mango TV, Huace Film & Television, Linmon Media, Jiaxing Jiuzhou Cultural Media Co., Ltd., and Dianzhong Technology Co., Ltd. Currently, the cost of producing a vertical-screen short drama is approximately $120,000-$150,000 per episode, but the midstream portion only accounts for 10%-15% of the overall industry chain revenue.

The downstream mainly consists of content distributors and streaming providers, primarily responsible for video distribution, traffic generation, and monetization. These include ReelShort, DramaBox, TopShort, FlexTV (Mega Matrix), GoodShort, and ShortTV. Currently, mainstream content distribution platforms include short video platforms, short video mini-programs, long video platforms, and independent short drama apps. Short video platforms are the primary reach platform, using story clips to attract users and form a closed-loop content consumption cycle. These platforms possess inherent advantages in developing micro-dramas, with a relatively higher degree of content compatibility, making them crucial channels for user acquisition and viewing. This segment also accounts for the largest share of revenue in the entire industry chain, approximately 80%-85%, with a gross profit margin as high as 60%.

Note: Micro-drama production companies are midstream short drama producers, but some companies are both producers and distributors. Midstream revenue primarily comes from guaranteed minimum payments and revenue sharing. To illustrate the market size of the short drama industry, the reference data represents the overall market size of the short drama industry.

At present, the daily recharge consumption of paid micro short dramas on all domestic platforms is already around 60 million yuan. According to the "2023 China Internet Audiovisual Development Research Report", in the past six months, 50.4% of the more than 1 billion short video users in my country have watched micro short dramas, micro variety shows, and instant noodles within 3 minutes. Fast-paced, high-density, and exaggerated plots are the biggest characteristics of micro short dramas, and they are also their magic weapon for attracting money. Tianyancha data shows that there are more than 230 micro short drama-related companies in the country, of which more than 30 new registered companies were added from January to October 2023, an increase of 225% year-on-year compared with 2022. Currently, the daily recharge consumption for paid micro-dramas across all platforms in China is around 60 million yuan. According to

the "2023 China Online Audiovisual Development Research Report," in the past six months, among my country's over 1 billion short video users, 50.4% have watched micro-dramas, micro-variety shows, and short-form anime series of three minutes or less. Fast-paced, high-density, and exaggerated plots are the biggest characteristics of micro-dramas, and also their key to success. Data from Tianyancha shows that there are currently over 230 micro-drama-related companies nationwide, with over 30 newly registered companies from January to October 2023, a 225% increase compared to 2022. As of June 2025, the number of micro-drama users nationwide has reached 696 million, accounting for nearly 70% of the total number of internet users. From a cultural perspective, micro-dramas have gradually become an important form of popular culture. From January to August 2025, major comprehensive video platforms launched 325 horizontal-screen micro-dramas (a year-on-year increase of 24.52%). The number of vertical-screen dramas launched on short video platforms, mini-programs, and micro-drama apps has also increased, with the total number of independently produced and launched vertical-screen dramas expected to reach approximately 40,000 in 2025. Media reports indicate that as of December 2024, 202 overseas short-drama apps had been launched in overseas markets. Viewers in Europe, America, and Southeast Asia show relatively high viewing and payment intentions. Download data from leading Chinese micro-drama apps shows that nearly 30% of downloads come from the United States. The first tier includes Reelshort and DramaBox; the second tier includes FlexTV, Goodshort, MoboReels, and ShortTV.
