Abstracts

According to our (Global Info Research) latest study, the global Paint-grade Red Lead Powder market size was valued at US\$ 59.27 million in 2025 and is forecast to a readjusted size of US\$ 76.10 million by 2032 with a CAGR of 3.8% during review period.

Paint-grade red lead powder is a red pigment primarily composed of lead oxide (Pb₃O₄). It features excellent anti-corrosion properties and covering power, commonly used in the production of anti-rust primers, heavy-duty anti-corrosion coatings, and metal protective layers. It is suitable for corrosion protection applications in bridges, ships, steel structures, and similar fields. In 2025, Global paint-grade red lead powder sales are estimated at 18 thousand tonnes, with an average ex-works price of 3,200 US\$/ton and global capacity is about 34 thousand tonnes per year, with a gross margin range of 12%?22%.

The remaining demand for paint-grade red lead powder is mainly driven by niche industrial anti-corrosion applications that still value its rust-inhibiting performance and compatibility with legacy protective coating systems. However, the market is structurally constrained by environmental regulation, occupational safety rules, and substitution by zinc phosphate and other non-lead anti-corrosion pigments.
