Abstracts

The biodiesel industry is expected to become a major source of revenue for industrial oil manufacturers in the next few years due to its reduced impact on the environment. Due to the development of the chemical, biodiesel and cosmetics industries, the industrial sectors of emerging countries in the Asia-Pacific region are also growing, of which China and India are the hubs of industrial oils. The industrial oil market is divided into soybeans, corn, sunflower, cottonseed, rapeseed, palm and others (olive oil, safflower, copra, peanut, linseed / flaxseed and grapeseed). The palm oil market is expected to account for the largest share of the global market in 2019. The Asia Pacific market has witnessed rapid growth in Indonesia and Malaysia, which account for more than 85% of global palm oil. This provides growth opportunities for palm oil manufacturers in these countries as they can export and use them domestically in industries such as biofuels.

According to our (Global Info Research) latest study, the global Palm Industrial Oil market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
