The panoramic head-up display (PHUD) is an advanced vehicle head-up display technology. The panoramic head-up display uses optical technology to project key information such as navigation, vehicle speed, oil pressure, tire pressure, etc. in color or black and white onto the barrier in front of the driver's sight. On the windshield. The panoramic head-up display not only reduces the time the driver takes his or her eyes off the road, but also provides a seamless experience from A-pillar to A-pillar, allowing multiple screens to be hidden under the dashboard and connected to each other, further enhancing the driving experience?.

The BMW Group's initial market launch/delivery schedule for related new vehicles is primarily in 2026. Valeo officially disclosed that its pillar-to-pillar 'Panoramic HUD' is expected to begin production in 2026 (specific models/brands were not disclosed). Continental officially announced that its Scenic View HUD is planned for market introduction in 2026.
