Paper Barrier Coating refers to functional coating materials applied onto paper and paperboard surfaces to improve barrier performance and enhance packaging functionality. These coatings provide resistance against moisture, grease, oxygen, water vapor, and other external factors while maintaining paper recyclability and lightweight characteristics. They are widely used in food packaging, beverage packaging, pharmaceutical packaging, and sustainable paper-based packaging applications. The product scope includes water-based, polymer-based, and bio-based barrier coatings, excluding ordinary printing coatings and decorative coatings.

The industry chain of Paper Barrier Coating includes upstream raw materials, midstream coating material manufacturing, and downstream packaging applications. Upstream suppliers provide polymers, additives, resins, solvents, and bio-based materials. Midstream manufacturers conduct formulation development, blending,

coating performance testing, and customized solution production. Downstream applications include paper packaging producers, food manufacturers, beverage companies, and consumer goods industries requiring environmentally friendly barrier packaging solutions.
