Paper-based Meta-Aramid (also known as paper-type para-aramid) is a type of paper material made from meta-aramid (aromatic polyamide) fibers, typically used in applications that require high strength, heat resistance, and chemical stability. Meta-aramid fibers have a molecular structure that provides excellent thermal stability, chemical resistance, and mechanical properties, making them ideal for producing high-performance paper-based materials such as insulation papers, filtration materials, and sealing products. This paper combines the high-performance characteristics of aramid with the flexibility and processability of paper, making it suitable for use in industries such as electronics, aerospace, automotive, and filtration.
