The global Paper Cup Sleeve market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Paper cup sleeve, also known as cup holder, is a paper sleeve wrapped around the outside of a paper cup, used to protect hands from heat and water droplets, and to provide better grip and anti-slip function to the cup.

It is usually made of recyclable materials, such as biodegradable paper and cornstarch, with the advantages of environmental protection and sustainable development. In some countries, the use of paper cup sleeves has become a common practice in places such as beverage shops and coffee houses.

The use of paper cup sleeves can reduce consumers' demand for plastic cup sleeves, thereby reducing environmental pollution and waste. At the same time, paper cup sleeves also provide enterprises with opportunities for brand promotion and marketing, and can be printed with corporate logos, slogans, etc.

This report studies the global Paper Cup Sleeve production, demand, key manufacturers, and key regions.
