According to our (Global Info Research) latest study, the global Paper Cutting Machine market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Paper cutting machines revolutionized the world of scrapbooking, Signs & Cards Making and other applications for consumer graphic design. Instead of having to purchase components such as stickers, letters, die cuts and shapes, a paper cutting machine allows you to make your own components to use on signs, scrapbooks, pictures and other applications.

Paper cutting machines generally work the same way that commercial graphics cutters do, only on a smaller scale: you enter the computerized image into the machine, and the machine's hard drive retrieves the image and cuts it on the included paper. Cutting machines work similarly to printers, only instead of printing images with ink or a laser, they use a micro blade to score the image into paper and make precise cuts.

The main players in North America are Cricut, Brother and Silhouette. These three companies account for more than 80% of the North American market. Other participants include Sizzix, AccuCut, Craftwell, Pazzles, Spellbinders Paper Arts, etc.

Paper Cutting Machine used in Signs & Cards Making, Scrapbooking, Papercrafting and other Use. Signs & Cards Making and Papercrafting Use together accounts for about 63.5% of the sales share in 2019.
