The global Paper Drywall Joint Tapes market size is expected to reach \$ 805 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Paper drywall joint tape is a rugged, cross-fibered kraft paper designed for use with joint compound to reinforce the joints and corners of gypsum drywall interiors. It is non-adhesive and must be embedded in a layer of joint compound. The paper is typically buffed on both sides to ensure superior bonding and features a center crease, which allows for easy folding to create neat, crisp inside corners. Unlike mesh tape, paper tape provides higher tensile strength, making it more resistant to cracking caused by structural shifting or seasonal expansion and contraction. In 2025, global Paper drywall joint tape production reached approximately 300 million units, gross margin 20%, average price 2 USD/unit.

This report studies the global Paper Drywall Joint Tapes production, demand, key manufacturers, and key regions.
