According to our (Global Info Research) latest study, the global Paper Drywall Joint Tapes market size was valued at US\$ 617 million in 2025 and is forecast to a readjusted size of US\$ 805 million by 2032 with a CAGR of 3.9% during review period.

Paper drywall joint tape is a rugged, cross-fibered kraft paper designed for use with joint compound to reinforce the joints and corners of gypsum drywall interiors. It is non-adhesive and must be embedded in a layer of joint compound. The paper is typically buffed on both sides to ensure superior bonding and features a center crease, which allows for easy folding to create neat, crisp inside corners. Unlike mesh tape, paper tape provides higher tensile strength, making it more resistant to cracking caused by structural shifting or seasonal expansion and contraction. In 2025, global Paper drywall joint tape production reached approximately 300 million units, gross margin 20%, average price 2 USD/unit.
