According to our (Global Info Research) latest study, the global Paper Like Screen Protector Film market size was valued at US\$ 746 million in 2025 and is forecast to a readjusted size of US\$ 1298 million by 2032 with a CAGR of 8.1% during review period.

In 2025, global production of paper-like screen protector films reached 125 million pcs, with an average selling price of USD 5.8 per pcs, a total production capacity of 155 million pcs, and an average gross margin of 46%.

A paper-like screen protector film is a functional protective film designed for tablets, e-readers, and certain touch-display devices. It typically features a fine matte micro-textured surface with anti-glare treatment, creating a paper-like friction and resistance when using a stylus or finger, which enhances writing, drawing, and note-taking experiences while reducing reflections and fingerprint visibility. The film is usually based on transparent substrates such as PET, and achieves the “paper-like feel” through coating, embossing, or micro-structure processing, while also providing wear resistance, scratch protection, and basic anti-smudge performance for study, office, and creative applications.

Upstream supply mainly includes optical-grade PET base films, release liners and adhesive materials (silicone/acrylic), anti-glare and wear-resistant coating chemicals, micro-texture embossing-related materials, and packaging supplies. High-end products often require advanced surface treatment know-how, proprietary coating formulations, and clean manufacturing conditions. Midstream players include paper-like film manufacturers and consumer accessory brands, with key processes typically covering film cutting, micro-texture surface finishing (embossing or coating), anti-glare/anti-

smudge coating, adhesive lamination, die-cutting, and packaging. Downstream customers are mainly tablet and e-reader users, education and office users, illustration/design creators, and 3C accessory distributors and e-commerce platforms. Sales are largely driven by online marketplaces and brand-direct channels, complemented by offline consumer electronics retail outlets.
