According to our (Global Info Research) latest study, the global Paper Straw Machines market size was valued at US\$ 1021 million in 2025 and is forecast to a readjusted size of US\$ 1493 million by 2032 with a CAGR of 5.6% during review period.

The paper straw machine is a machine that can manufacture paper straws for all kinds of drinks, such as bubble tea, coffee, etc.

Market CAGR for Straw Machine is being driven by the increasing demand for healthy food & beverage intake, and Brand owners moving toward providing eco-friendly packaging products. As reported by the International Council of Beverage Associations, 30% of soft drinks sold in Europe are categorized as no- or low-sugar beverages. The escalating demand for health-conscious food and beverage options is poised to drive the growth of the global food and beverage industry. On April 2018 European commission issued the directive that ban all single use plastic from 2021. Recognizing their corporate responsibilities, brand owners are increasingly shifting towards providing eco-friendly packaging products and cutlery. Manufacturers, brand owners, and retailers are actively introducing sustainable packaging solutions characterized by reusability, recyclability, or biodegradability. For example, in 2021, Sun-Rype Products, a division of A. Lassonde Inc., a Canadian fruit-based food and beverage manufacturer, announced the replacement of plastic straws with recyclable and flexible paper straws on all SunRype 200ml single-serve beverage boxes in Canada. This initiative encompasses all of SunRype's 200ml 100% juice and 200ml 60% less sugar juice products.
