The global Paper Surface Strength Enhancer market size is expected to reach \$ 307.6 million by 2029, rising at a market growth of 4.2% CAGR during the forecast period (2023-2029).

The global chemical industry is part of the global economic development, and the cyclical economic development envelopes the global chemical industry. In recent years, global economic growth has slowed down, and the growth rate of the chemical industry has also gradually slowed down. The development of emerging economies such as China and India has continued to promote the global chemical industry to maintain a certain development trend in the past few years. In the future, these economies will continue to drive the chemical industry market forward with their large population base and strong domestic demand growth.

Among the common factors affecting paper strength, one mechanism believes that the bonding force between fibers is an important factor affecting paper strength, and another mechanism believes that the dry reinforcing agent is an efficient dispersant, which can make the fiber arrangement more regular and the combination more stable. tighter, which enhances the bond between the fibers and gives the paper a higher dry strength.
