Abstracts

The global Paperboard Barrier Coatings market size is expected to reach \$ 722 million by 2029, rising at a market growth of 5.3% CAGR during the forecast period (2023-2029).

The demand for sustainable paper and paperboard packaging has increased dramatically in recent years because consumers have become more mindful of the effects their buying choices have on the environment. This trend has put significant pressure on paper and paperboard packaging producers to eliminate their use of barrier coatings that employ polyethylene, paraffin-based waxes, silicones and fluorochemicals and to switch to using more environmentally friendly barrier coatings, especially in food and beverage packaging applications.

Paperboard Barrier Coatings includes a range of products for water and vapor resistance, hot and cold liquids, and oils and greases. These barrier coatings are available as water-based polymer emulsions or solid biowaxes.

This report studies the global Paperboard Barrier Coatings production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Paperboard Barrier Coatings, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
