Abstracts

Paraldehyde is the cyclic trimer of acetaldehyde molecules. Formally, it is a derivative of 1,3,5-trioxane. The corresponding tetramer is metaldehyde. A colourless liquid, it is sparingly soluble in water and highly soluble in ethanol. Paraldehyde slowly oxidizes in air, turning brown and producing an odour of acetic acid. It quickly reacts with most plastics and rubber.

Scope of the Report:

This report focuses on the Paraldehyde in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In recent years, the average price of global vitamins has been rising (BASF 2014 factory accident, the overall price of vitamin in 2017 rebounded). The price of paraldehyde has also risen in the last two years.

Paraldehyde is mainly used for chemical intermediates. In addition, paraldehyde is also widely used in the dye and rubber industries. In 2016, chemical intermediates, dyes and rubber industry accounted for 91.17%, 3.80% and 1.71% of the consumer share. At present, the major manufacturers of the global market for vitamin B3 are Lonza, Jubilant Life Sciences, Vertellus and Brother Enterprises. The manufacturing process of Jubilant Life Sciences, Vertellus and Brother Enterprises are different from Lonza. So in this industry, Lonza did not have a significant competitor. Manufacturers outside Lonza have very little production capacity and production. The last two years, vitamin B3 enterprises continue to expand production capacity. In the next few years, vitamin B3 production capacity may be excessive, which will affect the development of

paraldehyde.

After decades of development, paraldehyde's market has been very mature. Therefore, the research group does not recommend new enterprises to enter the industry.

The worldwide market for Paraldehyde is expected to grow at a CAGR of roughly 3.9% over the next five years, will reach 150 million US\$ in 2023, from 120 million US\$ in 2017, according to a new GIR (Global Info Research) study.
