A Parking Fee Collection System is a system designed to manage vehicle access and payment settlement, commonly used in parking lots, on-street parking spaces, commercial complexes, airports, hospitals, business parks, and residential communities. The system typically integrates license plate recognition, barrier gate control, billing rules, payment terminals, mobile payment, e-invoicing, and back-office management platforms to enable vehicle identification, parking duration calculation, fee settlement, entry/exit control, and operational data analysis. With the development of smart cities and intelligent transportation, these systems are increasingly moving toward unmanned operation, contactless payment, cloud-based management, and multi-site connected operation.

The future of License Plate Recognition (LPR) parking systems will trend toward high precision, unmanned operation, contactless payment, cloud-based, and intelligent management. Systems will integrate AI image recognition, big data analytics, and IoT technologies to enable multi-site connected operation, dynamic pricing, parking guidance, membership management, and security monitoring. With the rise of electric vehicles, shared mobility, and smart city initiatives, LPR systems will increasingly integrate with EV charging management, traffic management platforms, and urban parking operation platforms, forming a comprehensive intelligent solution combining

“parking + payment + charging + operation.”
