Global Parts Washer key players include Ecoclean, Fives Group, Safety-Kleen, Cleaning Technologies Group and Jenfab Cleaning Solutions. Global top 3 manufacturers hold a share over 30%.

Asia-Pacific is the largest market, with a share about 37%, followed by North America and Europe, with the share about 25% and 31%. In terms of product type, Water/Aqueous-based is the largest segment, with a share about 60%. And in terms of application, the largest application is Industrial, followed by Automotive.

A parts washer is a piece of equipment used to remove contaminants or debris, such as dirt, grime, carbon, oil, grease, metal chips, cutting fluids, mold release agents, ink, paint, and corrosion from workpieces. Parts washers are used in new manufacturing and remanufacturing processes; they are designed to clean, degrease and dry bulk loads of small or large parts in preparation for assembly, inspection, surface treatment, packaging and distribution. Parts washers may be as simple as the manual 'sink-on-a-drum' common to many auto repair shops, or they may be very complex, multi-stage units with pass-through parts handling systems. Parts washers are essential in maintenance, repair and remanufacturing operations as well, from cleaning fasteners, nuts, bolts and screws to diesel engine blocks and related parts, rail bearings, wind turbine gears boxes and automotive assemblies.

This report studies the global Parts Washer production, demand, key manufacturers, and key regions.
