Abstracts

According to our (Global Info Research) latest study, the global Party Robot Rentals market size was valued at US\$ 711 million in 2025 and is forecast to a readjusted size of US\$ 1068 million by 2032 with a CAGR of 6.1% during review period.

Party robot rental refers to a service model where rental service providers offer clients intelligent robot equipment with interactive performance, greeting, entertainment, simple service, or marketing display functions, along with an integrated service model that includes transportation, deployment, on-site technical support, and content customization. Clients pay based on event duration or project duration, leveraging robots to enhance the technological feel, interactivity, and dissemination of their events without incurring high procurement and maintenance costs.

With the rapid advancements in artificial intelligence, service robots, and human-computer interaction technologies, coupled with the event industry's strong demand for 'differentiated experiences' and 'social media dissemination,' party robot rental is transitioning from a niche market to commercialization. In scenarios such as brand marketing, shopping mall traffic generation, wedding celebrations, and exhibitions, the value of robots as 'eye-catching tools' and 'interactive media' is increasingly being validated. Simultaneously, declining hardware costs and enhanced software customization make the rental model more cost-effective. In the future, intelligent robots combining large-scale voice interaction, emotion recognition, and AR/VR integration will further enhance user experience. Coupled with the high demand for technological displays in East Asia and the Middle East, this segment is expected to maintain rapid growth, but it is still in its early stages of development, and market education and standardized service capabilities are crucial.

This report is a detailed and comprehensive analysis for global Party Robot Rentals market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Party Robot Rentals market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Party Robot Rentals market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Party Robot Rentals market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Party Robot Rentals market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Party Robot Rentals

To forecast future growth in each product and end-use market
