According to our (Global Info Research) latest study, the global Passenger Boarding Stairs market size was valued at USD 149.6 million in 2023 and is forecast to a readjusted size of USD 184.8 million by 2030 with a CAGR of 3.1% during review period.

Passenger Boarding Stairs provide a mobile means to traverse between the aircraft doors and the ground. Because larger aircraft have door sills 5 to 20 feet high, stairs facilitate safe boarding and deplaning. Smaller units are generally moved by being towed or pushed, while larger units are self-powered. Most models have adjustable height to accommodate various aircraft. Optional features may include canopies, heating, supplementary lighting, and a red carpet for VIP passengers. Larger aircraft may use one or more jet bridges connected to the terminal building for passenger boarding, but ground-based stairs are used when this is unavailable or impractical.
